NAMING

Say it the same way everywhere

The company and the product are both called Prompted. Our website is promptedbrand.com. Write the name the same way in every language.

✓ Write
Prompted Brand
Our name: two words, capital P and B. After the first mention, Prompted on its own is fine. The company is Prompted Brand Inc.

✓ Write
promptedbrand.com
Our website, always lowercase. Use it when you link to us.

✓ Write
Insights, AI Ads
Product areas in sentence case, as they appear in the app.

✗ Avoid
prompted - PROMPTED
Lowercase is for the logo only, never all caps in text.

✗ Avoid
Prompted.com
Not our domain. Write promptedbrand.com.

✗ Avoid
PromptedBrand - Prompted Inc.
Never one word, and no other words after the name.

LOGO

The wordmark and the cursor

Use the files as they are. Don't redraw, re-space or recolour them. The wordmark is the default; the icon is for small, square spaces.

The cursor is the logo
The bar after "prompted" is a text cursor: the moment before an answer is written. It blinks on screen (1 s) and stands still in print, in email and when reduced motion is on.

Clear space

prompted
BRAND INC.

x = the height of the cursor. Keep at least x free on every side; nothing else goes inside that space.

Minimum size

prompted
WORDMARK · 96 PX / 25 MM

pI
ICON · 24 PX

Below these sizes the cursor turns into a smudge. Use the icon instead of the wordmark when space is tight.

Please don't

prompted
Don't stretch or squash it

prompted
Don't recolour it

prompted
Don't remove the cursor

prompted
Don't add outlines or shadows

prompted
Don't place it on busy images

Don't retype it in another font

COLOR

Dark ground, one glow

Prompted is dark first. Ink is the ground, white carries the words, and cyan is the glow that points at what matters.

Ink
The ground for almost everything we make.
#050B0A · RGB 5, 6, 10

White
Words, numbers and the wordmark on dark.
#FFFFFF · RGB 255, 255, 255

Glow cyan
The cursor, the glow and the one thing that matters.
#4CEBFF · RGB 76, 224, 255

How much of each
Mostly ink, some white, a touch of glow

TYPOGRAPHY

Four typefaces, four jobs

Each typeface has one job. Mixing them up is the quickest way to make something look off-brand.

Sora 600 — WORDMARK ONLY

prompted

Tracking -0.045em. Never use it for headlines or body text.

Space Grotesk — HEADLINES AND BIG NUMBERS

Be the answer. 41.2

Weights 500–700. Tight tracking on large sizes.

Geist — INTERFACE AND BODY

We asked four AI engines 186 questions your customers ask. Here is where you stand, and what to fix first.

Weights 400–600. Body at 15–17 px, line height 1.6.

Geist Mono — LABELS AND DATA

VISIBILITY 41.2 ▲ 3.0
CHATGPT · GEMINI · PERPLEXITY

Uppercase eyebrows, table headers, figures.

All four are free on Google Fonts. Fallbacks: system-ui for Geist and Space Grotesk, ui-monospace for Geist Mono.

THE GLOW

Light that points at the answer

The glow is our signature, so it has to stay rare. When everything glows, nothing does.

YOUR AI VISIBILITY
41.2
▲ 3.0 since you started

- **One glow per view**
  The rotating glow border goes on the single most important thing: the headline number, the selected item or the main panel.
- **Glow means "look here"**
  Use it on the primary button and on what changed. Never on body text, logos of other companies or decoration.
- **Light theme keeps the color**
  On white, cyan stays vivid as a fill or line; text in the accent color uses the deeper #0198A8 so it stays readable.
